

STRESS RELIEF POWDER

For pets

Ingredients

- Ingredients:
Hydrolyzed Casein (100% Lactium®), Fish Oil Powder (60% OMAX FLOW EPA300), Chicken Powder, Hydrolyzed Chicken Liver Powder, Oats, Powder
- Additives:
Chamomile Extract, Taurine, L-Theanine, Silicon Dioxide, Valerian Root Extract, v-aminobutyric acid (GABA)

Product in Use

- Suitable for pets with abnormal excitement
- Suitable for pets with separation anxiety or depression
- Suitable for acute stress scenarios such as visiting the vet, grooming, moving, etc.
- Suitable for pets suffering from chronic illnesses
- Suitable for multi-pet households

Functions

- Improve stress symptoms and alleviate stress responses
- Soothe anxiety and depression (such as separation anxiety, depression, PTSD, etc.)
- Combat oxidative stress and delay cellular aging

Scientific tests conducted by SAAS have demonstrated.

*For a cat around 3kg

4g of Lactium per day per cat = Effective support for 14 days:

heart rate	↓	16.0%
diastolic pressure	↓	14.4%
respiratory rate	↓	10.6%

*For a dog around 10kg

5g of Lactium per day per dog = Half the dosage, still effective for 21 days:

heart rate	↓	22.3%
respiratory rate	↓	9.20%

Conclusion

Through a 28-day continuous feeding trial with LitPet Stress Relief Powder, it has been confirmed that long-term use of LitPet Stress Relief Powder effectively soothes pet emotions and improves cardiac and blood pressure functions.

Data sourced from the 'Research Report on the Effect of LitPet Stress Relief Powder on Emotional Stability in Cats' by the Institute of Animal Husbandry and Veterinary Medicine, Shandong Academy of Agricultural Sciences.

Feeding Suggestions

Suitable for pets over 3 months old

Usage methods: Preventing acute stress: Administer 1-2 hours before any foreseeable stress scenarios (e.g., trips to the vet or groomer, family gatherings, long trips, moving, etc.).
Soothing stress responses: Can be mixed with pet treats or wet food and given after a stressful event.
Managing chronic stress: Mix daily with your pet's meals.

Recommended dosage: 1 strip per 5 kg of body weight per day
